

**We are the Denver Center for the Performing Arts.**

We are best known for our touring Broadway shows and Tony-winning theatre, but as a not-for-profit organization that serves the entire Rocky Mountain region with the best arts programming and education possible, we're so much more than that.

**Software Developer:** The Denver Center for the Performing Arts (DCPA) is accepting applications for the position of Software Developer. This position is responsible for engaging on different I.T. projects across the organization. Engagement can include the designing, building, testing, deploying custom applications as well as customizing the development of off-the-shelf applications. This position requires experience in desktop and iOS development as well as SQL / report development. The teammate in this position will also play a role in developing standards, establishing guidelines and best practices for application development and maintenance, as well as consult on new and ongoing development efforts. The ideal candidate must have experience developing websites, mobile apps, working with diverse business partners and the ability to manage concurrent development efforts. Incumbent works under the direction of the Director of IT for Applications and Data.

**Primary duties include:**

Essential duties include, but are not limited to:

- Work as part of a team to help define and implement processes and applications
- Assesses business and application requirements for corporate data, imaging, and voice networks
- [Plans, designs,] implements and upgrades application platforms based on specifications
- conducting testing and installing the program into production
- Troubleshoots application issues and functions, making recommendations for system fixes and enhancements
- Makes recommendations to the Director of IT regarding policies and standards for computer networks
- As require, works with vendors on implementation, optimization, and ongoing management of the organization's networks.
- Other duties as assigned by manager.

## Requirements Include:

Must be detail oriented, strong multi-tasking abilities, and have hands-on experience with design, implementation, and troubleshooting of computer networks. Excellent communication, self-management, and organizational skills.

- Microsoft MCSD and/or a Bachelor's degree in computer science or related field
- Must have some experience working in a Microsoft development environment with duties including application design, implementation, and troubleshooting / problem solving
- Experience working on agile teams
- Excellent problem-solving skills and ability to think logically
- Experience designing and leveraging web services, APIs and other interfaces
- Experience with ticketing systems is a plus
- Experience developing / implementing / using Rest APIs is a plus
- Microsoft Visual Studio, Microsoft SQL Server Management Studio, SQL, Microsoft SharePoint, SQL Tools. Experience with ASP.Net, C# and/or Microsoft Dynamics a plus
- Typically 2-4 years' experience

This position is a full-time position with benefits. If you're interested in applying, please e-mail a cover letter, references, salary requirements and resume to [hrdirector@dcpa.org](mailto:hrdirector@dcpa.org) No phone calls please.

*The Denver Center for the Performing Arts is dedicated to building a culturally diverse and equitable environment and strongly encourages applications from minorities and women. This position will remain open until a diverse pool of candidates is identified.*
